

1:24,000 UTM Corner Grid Reader
Each mark equals 100 meters

1:24,000 UTM Grid Reader
Each mark equals 100 meters

To help maintain accuracy this box should print to equal one inch by one inch.

Use these free UTM and Latitude and Longitude rulers on clear transparencies or on paper. Be sure to print this sheet without scaling or shrinking.

Note: Although these rulers have been checked for accuracy Hannik Navigation LLC cannot guarantee the accuracy of these rulers after printing. We recommend purchasing a ruler from one of the suggested retailers if you need a ruler for professional purposes.
